

Thrussington's Systematic Synthetic Phonics Programme

March 2021

Our Systematic Synthetic Phonics Programme uses the progression of sounds outlined in the DfE guidance document 'Letters and Sounds'. It also uses the pictures, actions and stories from Jolly Phonics for Phases 2 and 2. We promote the use of phonics as the route to reading unknown words, before any subsequent comprehension strategies are applied. We teach the tricky words/common exception words discretely. (Core criteria 1 and 2)

We enable children to start learning phonic knowledge and skills early in Reception (after the first 3 week period of part time schooling and baseline assessment), and provide a structured route for most children to meet or exceed the expected standard in the Year One Phonics Screening Check as well as all National Curriculum expectations for word reading through decoding by the end of Key Stage 1 (Core criteria 3)

See appendix 1 for our GPC and tricky word progression document

Our daily sessions

We have daily teaching sessions and teach the main grapheme-phoneme correspondences of English (the alphabetic principle) in a clearly defined, incremental sequence based on the progression of sounds outlined in the DfE guidance document 'Letters and Sounds'. Our scheme also uses the pictures, actions and stories from Jolly Phonics. (Core criteria 4, 5, 6, 7, 8, 9)

Our daily direct teaching sessions involve a routine so that teachers and children get to know what is coming next and minimum time is spent explaining new activities. We follow the structure of 'revisit and review', 'teach', 'practise' and 'apply' in each lesson. Our teaching and learning activities are interesting and engaging but firmly focused on intensifying the learning associated with the phonic goal. Where computer-based resources are used, these support direct teaching by the teacher and don't replace it. Where online delivery is necessary, this is done through daily recorded phonic lessons which follow the same structure that children are used to within school. At each step of a daily session, children have sufficient time to practise reading and writing with the grapheme-phoneme correspondences they have been taught, cumulatively. We provide words and texts for reading practice and teaching activities for writing practice (letter formation and spelling). To accommodate the learning needs of children with special educational needs and/or disabilities, we sometimes make use of small magnetic whiteboards with magnetic letters as well as phoneme frames. Our flashcards, word cards and grapheme wall posters match the GPCs and progressions in our programme. Once children begin to be introduced to a phoneme with different grapheme representations, we introduce an alternative visual picture for each grapheme representation as this helps children to distinguish between these GPCs when spelling. (Core criteria 12 and 14)

Common Exception words/Tricky words

We ensure that children are taught to decode and spell common exception words (sometimes called 'tricky' words), appropriate to their level of progress in the programme. These words are those that include grapheme-phoneme correspondences (GPCs) that are an exception to those children have been taught. They include correspondences that are unusual and those that will be taught later in the programme (such as 'was' and 'me'). We teach the children to read and then spell common exception words, noting the part of a word that makes it an exception word. We introduce the first five common exception/tricky words in the children's first half term and gradually introduce these during the phase that the children are being taught. Each child has their own 'tricky word packet' and, where children are confidently reading the words they have in their packet, the next two are introduced to individual children at their own pace during their one to one reading time each week, highlighting the part of the word that makes it an exception/tricky word. (Core criteria 10)

Letter formation

We provide resources that support the teaching of lower-case and capital letters correctly, with clear start and finish points. All resources designed for children to read are in print. Our programme moves children on by teaching them to write words made up of learned GPCs, followed by simple labels and captions, followed by

sentences composed from such words, as well as any common exception words ('tricky words') learned. We teach simple exit strokes for letters that end 'on the line' (a, d, h, i, k, l, m, n, t, u) but do not teach using a cursive script. (Core criteria 11)

Decodable texts and books

The texts and books that children are asked to read independently are fully decodable for them until children have learned all GPCs in the programme. The books are composed entirely of words made up of grapheme-phoneme correspondences that a child has learned up to that point. The only exception is a small number of common exception words that the child has learned as part of the programme up to that point. Practising with such decodable texts helps to make sure children experience success and learn to rely on phonic strategies. (Core criteria 13)

At each stage, our books come from the following publishers but these have been carefully aligned to reflect the GPCs at that stage –

We share the structure of our reading book scheme with parents, including explaining how the books match to our phonics programme, which GPCs are taught at each stage that their child receives and how to support their child with reading, particularly as they begin to learn to read.

See appendix 2 for the progression in our reading book scheme and its direct links to our Systematic Synthetic Phonics Programme.

Assessment and tracking

We conduct frequent and ongoing assessment throughout our daily phonics sessions as well as when we read with each child individually once a week. We also use our individual half termly phonics tracker document to assess the children's retention of GPCs and their ability to read and spell with these GPCs as well as recognise taught tricky words. This helps us to track and record children's progress and to identify those children at, below or above expected levels, so that appropriate support can be provided. Children who are at risk of falling behind (the lowest 20%) are given extra practice to consolidate and master the content of the programme. We support these children through extra 1 to 1 and small group sessions as well additional 1 to 1 reading opportunities. (Core criteria 15)

Training

We provide full guidance for teachers to support the effective delivery of the programme. High-quality training is an important element of our programme and is key to ensuring it is effectively implemented with fidelity and consistency. Continuous professional development of all those leading or delivering phonics teaching, including new members of staff joining the school or staff who have had a period of absence, is of great importance to us. The phonics leader delivers the training as she has shaped the scheme for the school and has taught across Early Years and Key Stage One for many years. We are responsive to changing circumstances and have an ability to adapt delivery methods when required. (Core criteria 16)
